*Terms & Conditions apply

Dear Guest,

It is our great pleasure to welcome you to SAii Lagoon Maldives. We hope you have a great stay with us. We kindly want to remind you of a few safety tips for on unforgettable Maldivian holiday retreat.

SWIMMING SAFETY

- Please note that we do not have a life guard on duty and swimming is at your own risk.
- Never swim alone - use the buddy system. Don't overestimate your swimming ability. A lot of people are used to swimming in the pool, in still water. Conditions are different in open water, and distance and direction are affected by currents. If you find yourself in a strong current, it is best not to tire yourself by trying to swim against it, rather swim diagonally across it, until you reach shore, further down the beach.
- Always wear full snorkeling equipment including fins.
- Always evaluate the conditions and do not go out when there is strong wind, choppy seas or bad weather. Please avoid swimming when it is dark.
- Never swim while intoxicated. Alcohol impairs judgement, unnecessary risks are taken and a swimmer will tire more easily, increasing the chance of an accident. Alcohol is a contributory factor in one third of all major incidents in the water.
- Even the Maldives have worm waters; the water is still relatively cool compared to your body temperature. This can lead to hypothermia. Heat dissipates a lot quicker from muscles, arms and legs. Once arms and legs start to lose heat then you have no power in them. This leads to not having the power to swim the distance to get back. That is why people get into trouble in the water. So limit your swimming time.
- If you experience problems while swimming and snorkeling, please follow these procedures:
 - 1) Stay calm and don't panic
 - 2) Take off your mask and snorkel
 - 3) Turn on to your back and swim backwards
 - 4) Wave your hands to signal that you need help

STAYING SAFE UNDERWATER & ON LAND

The key is simply don't touch. Sea creatures tend to stay away from humans, the titan triggerfish is the only fish that will actually come for you if you get too close during its mating season. It will tilt sideways and fly at you fearlessly. Usually these are bluff charges and you should swim away promptly and horizontally. Please do not take anything from the sea or beach, bring back home only memories.

Drink enough water...Minimum 2 litres a day, the more the better. Drinks, such as soft drinks, coffee, or alcohol-containing beverages, are no substitute for water. Although they contain water, they also contain ingredients which are dehydrating. GO ONE FOR ONE. When you consume alcohol, drinking almost the same amount of water is recommended in between drinks.
